

We strongly supported the federal 'Do Not Call' law when and as originally passed. The New Jersey version of this law is in our opinion superior to the federal law and support it as such. We oppose the requested changes for the following reason(s). (1) If at the time of a transaction we want a business to contact us in the future we will so state. (2) A business can request our permission at the time of a transaction thus forming a better relationship. We currently do both of the above, successfully.
